

## Environmental Permitting

Arcus provides environmental permitting services for both new applications and for variations to existing permits. Our permitting services include:

- Strategic Advice and Project Management
- Undertaking or Supporting Applications for New Permits; Variations, Transfers or Substantial Changes to Existing Permits; and Surrender of Permits
- Producing Site Condition Reports
- Development of Environmental Management Systems
- Assisting with Permit Improvement Conditions
- Undertaking H1 Environmental Risk Assessments
- Review of Best Available Technique (BAT)

In addition, Arcus provides a range of specialist services in support of permit applications including:

- Habitat Assessment
- Noise Assessment
- Flood Risk Assessment and Hydrology Services
- Site Investigation
- Baseline Assessment and Determination of Remediation/Reclamation Options
- Odour Impact Assessment
- Hydrogeological Impact Assessment
- Air Quality Assessment

Our permitting support services complement our extensive experience in coordinating and managing planning applications and undertaking Environmental Impact Assessment.
